

INDUSTRY FORUM DESCRIPTION

Adopting EO values and the Chapter Forum mindset, the Industry Forum is a dedicated space focusing on members' growth and development related to their businesses. This forum consists of 6-10 members from the same industry but geographically dispersed. They adopt an industry forum constitution and meet on pre-set cadences and formats (virtual or in person). By sharing experiences and engaging in 5% deep dives into business topics, members can reflect on their own journeys and harness transformational growth.

The key difference between a Chapter Forum and an Industry Forum is their focus: while a Chapter Forum emphasizes personal growth journeys, an Industry Forum centers on sharing and addressing business related experiences.
