

Biography: Allison Jenkins, MPH

Toxicology, Risk Assessment, and Research Division
Texas Commission on Environmental Quality

Current Position

Allison is a Senior Toxicologist and Work Leader with the Toxicology, Risk Assessment, and Research Division at the TCEQ.

Prior Experience and Education

Allison Jenkins is a regulatory toxicologist and risk assessor with more than thirty years of wide-ranging experience in all facets of regulatory toxicology. Her major responsibilities are to evaluate air monitoring data, conduct toxicity assessments to develop acute and chronic inhalation toxicity factors, review risk assessments for remediation sites, and address human health issues concerning surface water and groundwater. Allison has an MPH in environmental health from the University of Hawaii and a BS in toxicology from the University of Louisiana at Monroe. She first joined the TCEQ in 1993, left the agency in 2004 to work as a toxicologist for the environmental consulting firm Tetra Tech, and rejoined the agency in 2007. Before joining the TCEQ, Ms. Jenkins worked for what is now Ramboll in Louisiana and ICF in Virginia conducting risk assessments for pesticides, solvents, and PCBs and for a US Air Force contractor at Hickam AFB managing the investigation of Air Force remediation sites throughout the Pacific.
