

Introducing...

# FujiMAC 80R II

## Air Pump

Engineering design breakthroughs make FujiMAC Blowers

- the best choice for energy conservation and economical operation.

- Quietest air diaphragm blower among the four US market leading brands.

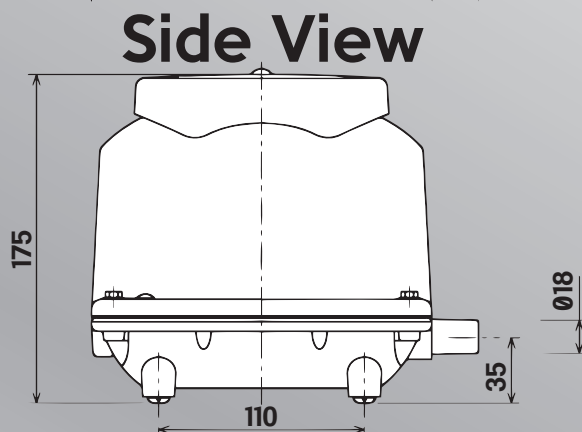

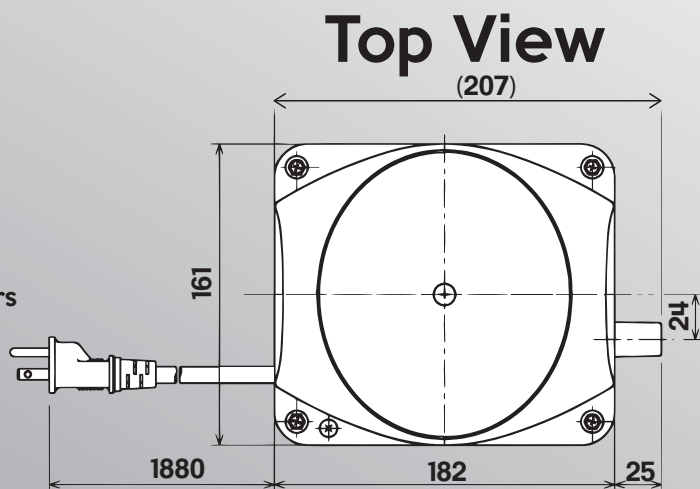

- Run 7-9 degrees cooler than leading brands.

- Warranty is 2 years.

- Only sold through distribution entities with full product training, spare parts in stock and absolute top quality customer service.

- Tested for endurance in high and low temperature extremes proving the durability of our diaphragm and other components.

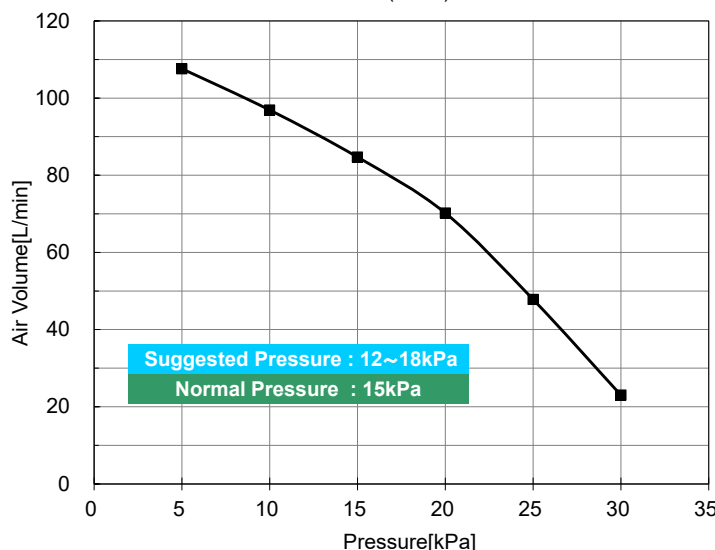

- The diaphragm assemblies are easily replaced and replacement parts are readily available from the manufacturer.

## SPECIFICATIONS

Model	MAC80R II
Rate Voltage	120V
Air Flow	2.8CFM (80L/min)
Pressure	2.2PSI (15kPa)
Outlet Pipe	1/2" (external 3/4 dia.)
Weight	11 lbs. (5 kg.)
Power Consumption	54w
Noise Level	39dB

Performance Curve  
MAC80R (60Hz)
