Course Description

This course provides a unique opportunity to gain advanced understanding of multiple treatment modalities through interactive chairside patient demonstrations at a renowned dermatologic surgery practice. Over a dozen therapies using both energy-based devices and injectable agents will be demonstrated, followed by straightforward, practical discussions. Attendees will participate in small groups that move successively through patient treatment rooms throughout the course, interacting with faculty and peers as they view expert techniques.

Learning Objectives

Following this activity, participants should be able to:

- Assess multiple treatment modalities available for aesthetic concerns including but not limited to skin laxity, fine lines and wrinkles, compartmentalized fat, volume loss, skin health and overall appearance, facial symmetry and general cosmesis.
- Review the indications and select the appropriate treatment modalities and potential complication profiles for energy-based devices and injectable agents covered in this activity.
- Demonstrate advanced understanding behind the science of energy-based devices and injectable agents covered in this activity.

Please Note

- Lunch and dinner on Saturday will be provided; breakfast is on your own both days.
- Schedule, agenda and faculty are subject to change.
- By attendance and participation in this course, you agree to allow ASDS to use photos taken by ASDS at this course for promotion of ASDS activities and programs.
