

Biography: Michael Marcon, P.G.

**Principal
InControl Technologies, Inc.**

Current Position

Michael Marcon is the senior principal hydrogeologist and risk assessor providing oversight and review for environmental site assessment and response actions.

Prior Experience and Education

Michael has worked in the private sector since beginning his career in 1990. His initial focus was in air modeling and risk assessment simulating catastrophic failures in chemical and petrochemical facilities. He transitioned into the RCRA and Superfund practice areas and served as a National Resource for strategy planning and risk modeling for major Superfund and RCRA sites and PRP Groups. For the last 20 years, he has focused his efforts primarily within Texas including the Texas Voluntary Cleanup Program, chlorinated solvent issues and dry cleaner assessments and remediation. Michael has helped develop a number of statistical and numerical modeling applications to quantify risk and exposure. Michael has a Bachelor of Science in Mathematical Statistics and in Computer Science. He also has a Masters in Science in Mathematical Statistics from McNeese State University.
