

Biography: Macayla Coleman

Stormwater Team
Water Quality Division
Texas Commission on Environmental Quality

Current Position

Macayla Coleman has been with TCEQ since February 2019 as a Permit Writer in the Stormwater Team within the Water Quality Division. She is responsible for conducting technical reviews of municipal stormwater management programs and annual reports as well as drafting individual stormwater discharge permits under the Texas Pollutant Discharge Elimination System (TPDES). In addition, she provides technical guidance to stormwater permittees on industrial, construction, and municipal program requirements for individual and general TPDES permits. Macayla assists with the oversight of the Stormwater Processing Center and currently is the project manager for the 2023 Construction General Permit renewal and the 2024 Phase II Municipal Separate Storm Sewer System (MS4) General Permit renewal. She was the project manager for the sand mining rulemaking to Title 30 Texas Administrative Code Chapter 311 and assisted the project manager for the 2021 Multi-Sector General Permit renewal.

Education and Prior Experience

Macayla earned her Bachelor of Science degree in Biology from the University of Arkansas in 2016, her Master of Science in Environmental Science and her Master of Public Affairs at Indiana University in 2018. Her experience includes conducting rapid bioassessments on rivers and streams in Texas and Indiana as well as collecting and analyzing water quality samples as part of the National Clean Lakes Program while pursuing her graduate degrees.
