

Biography: Andy Trevino, P.E.
Radioactive Materials Division
Texas Commission on Environmental Quality

Current Position

Andy Trevino currently works in the Underground Injection Control (UIC) Permits Section as project manager performing technical evaluations of Class I and Class III waste disposal well applications and preparing permits for these applications.

Prior Experience and Education

Mr. Trevino previously worked on the Radioactive Materials Licensing team as an engineer and on the Industrial & Hazardous Waste Permits Team as a permit coordinator performing technical evaluations of RCRA and non-hazardous permit applications for industrial and hazardous waste facilities. In addition to working at TCEQ, Mr. Trevino was employed by Johnston & Cloud, an oil and gas consulting firm in Austin, where he worked as a regulatory oil and gas consultant. Mr. Trevino also spent 14 years at the Texas Railroad Commission working in the Underground Injection Control Section, Site Remediation Section, Field Operations - State Funded Plugging Section and worked in the Hearings Division as a Technical Hearings Examiner. Mr. Trevino received a B.S. in petroleum engineering at the University of Texas at Austin in 1988 and is a registered professional engineer in Texas.
