01

What is Toxic
Tech?

What is **Toxic Technology**?

“Toxic technology describes the harmful characteristics caused by poor design, or neglect. Poor design is common, in an industry where outputs are often favoured over outcomes. Neglect is systemic, caused by short-termist cultures, processes and practices which inhibit sustainability.”

David Rogers, Toxic Technology

Poll #1

Are you **struggling** with
toxic technology at your
association?

02

Red Flags

Complaints you will hear

“Nobody likes it”

**“It’s old and
outdated”**

**“It doesn’t do
what I want it
to do”**

**“It’s not user-
friendly”**

“It’s hard to support”

**“It’s hard to
change or
configure”**

**“It’s too
technical”**

**“I can’t get
what I want
out of it”**

“It’s too expensive”

**“I don’t
understand it”**

Complaints you will hear **DISCUSSION**

03

Root Causes

Strategy Alignment

Power Dynamics

In/Out Groups

Lack of Technical Skills and Knowledge

Pre-existing Mindsets & Bias

Aging and Outdated Technology

04

Associated Risks

Poll #2

What **risks** would you
associate with a toxic
technology environment?

Toxic Tech - Risks

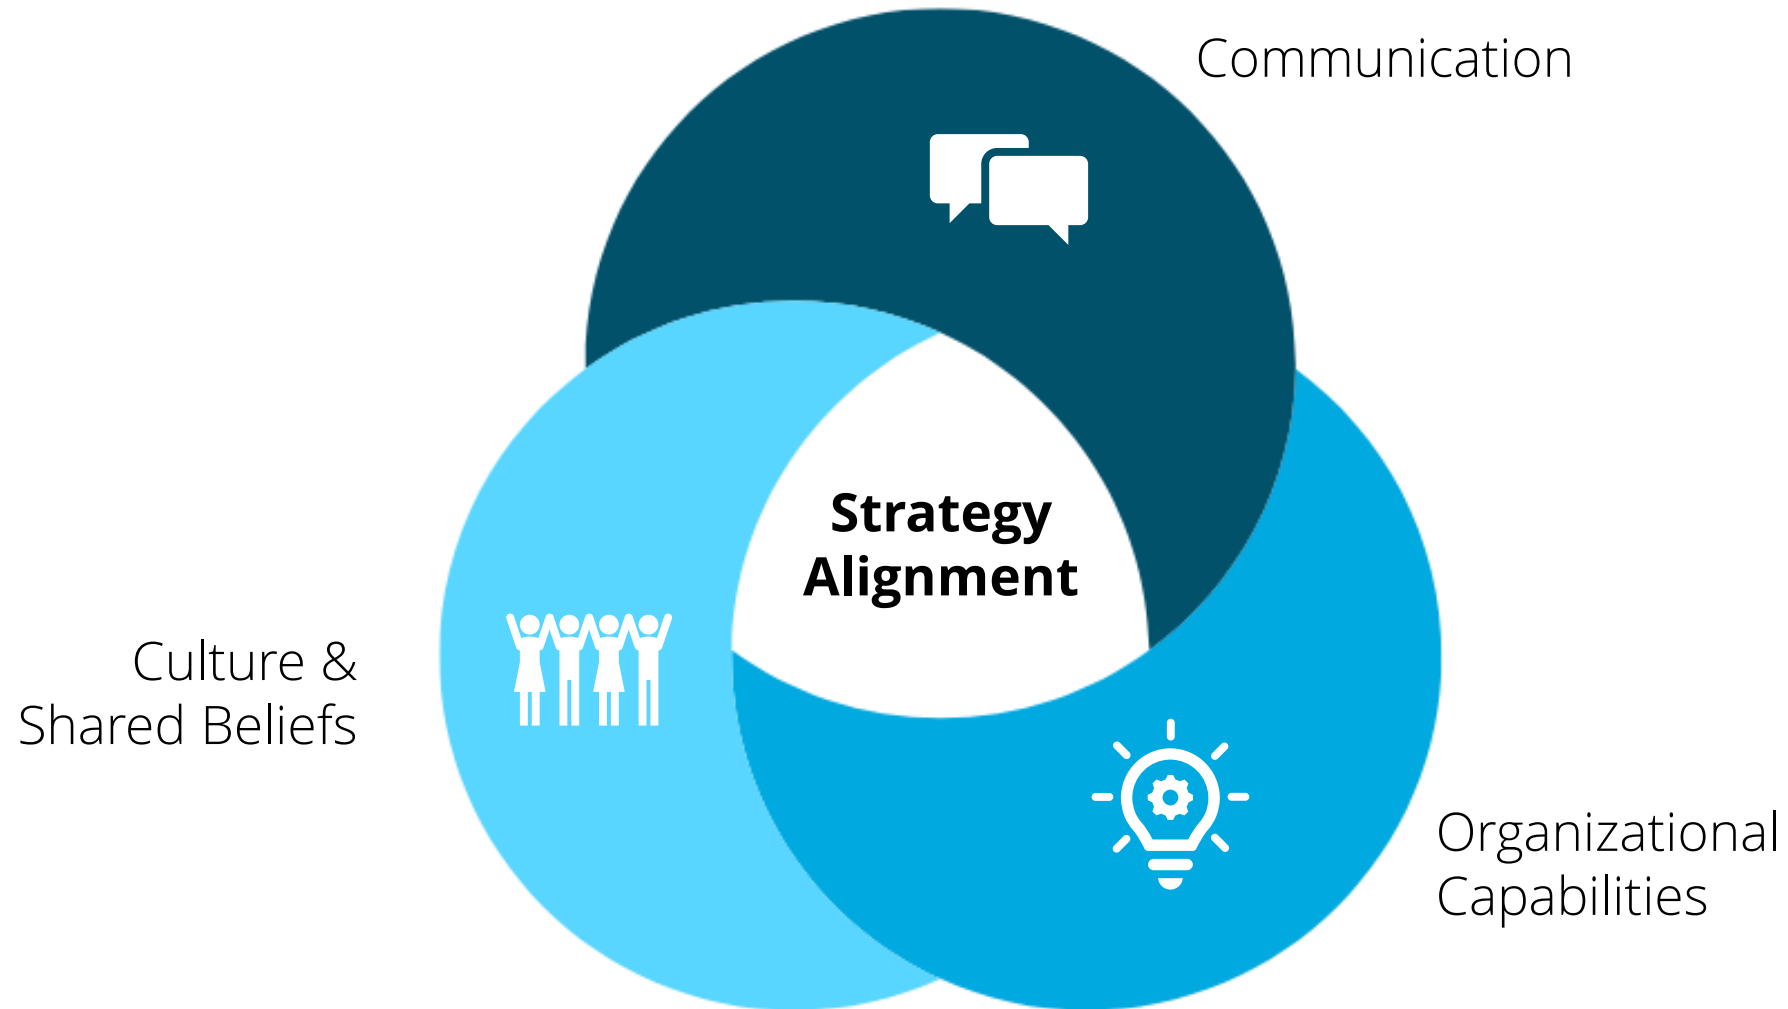

- Always chasing the next great technology
- Absence of trust
- Hiding the truth
- Employee morale
- Waste of time & resources
- Increased costs
- Brittle systems
- Cyber security
- Technology boom and bust cycles

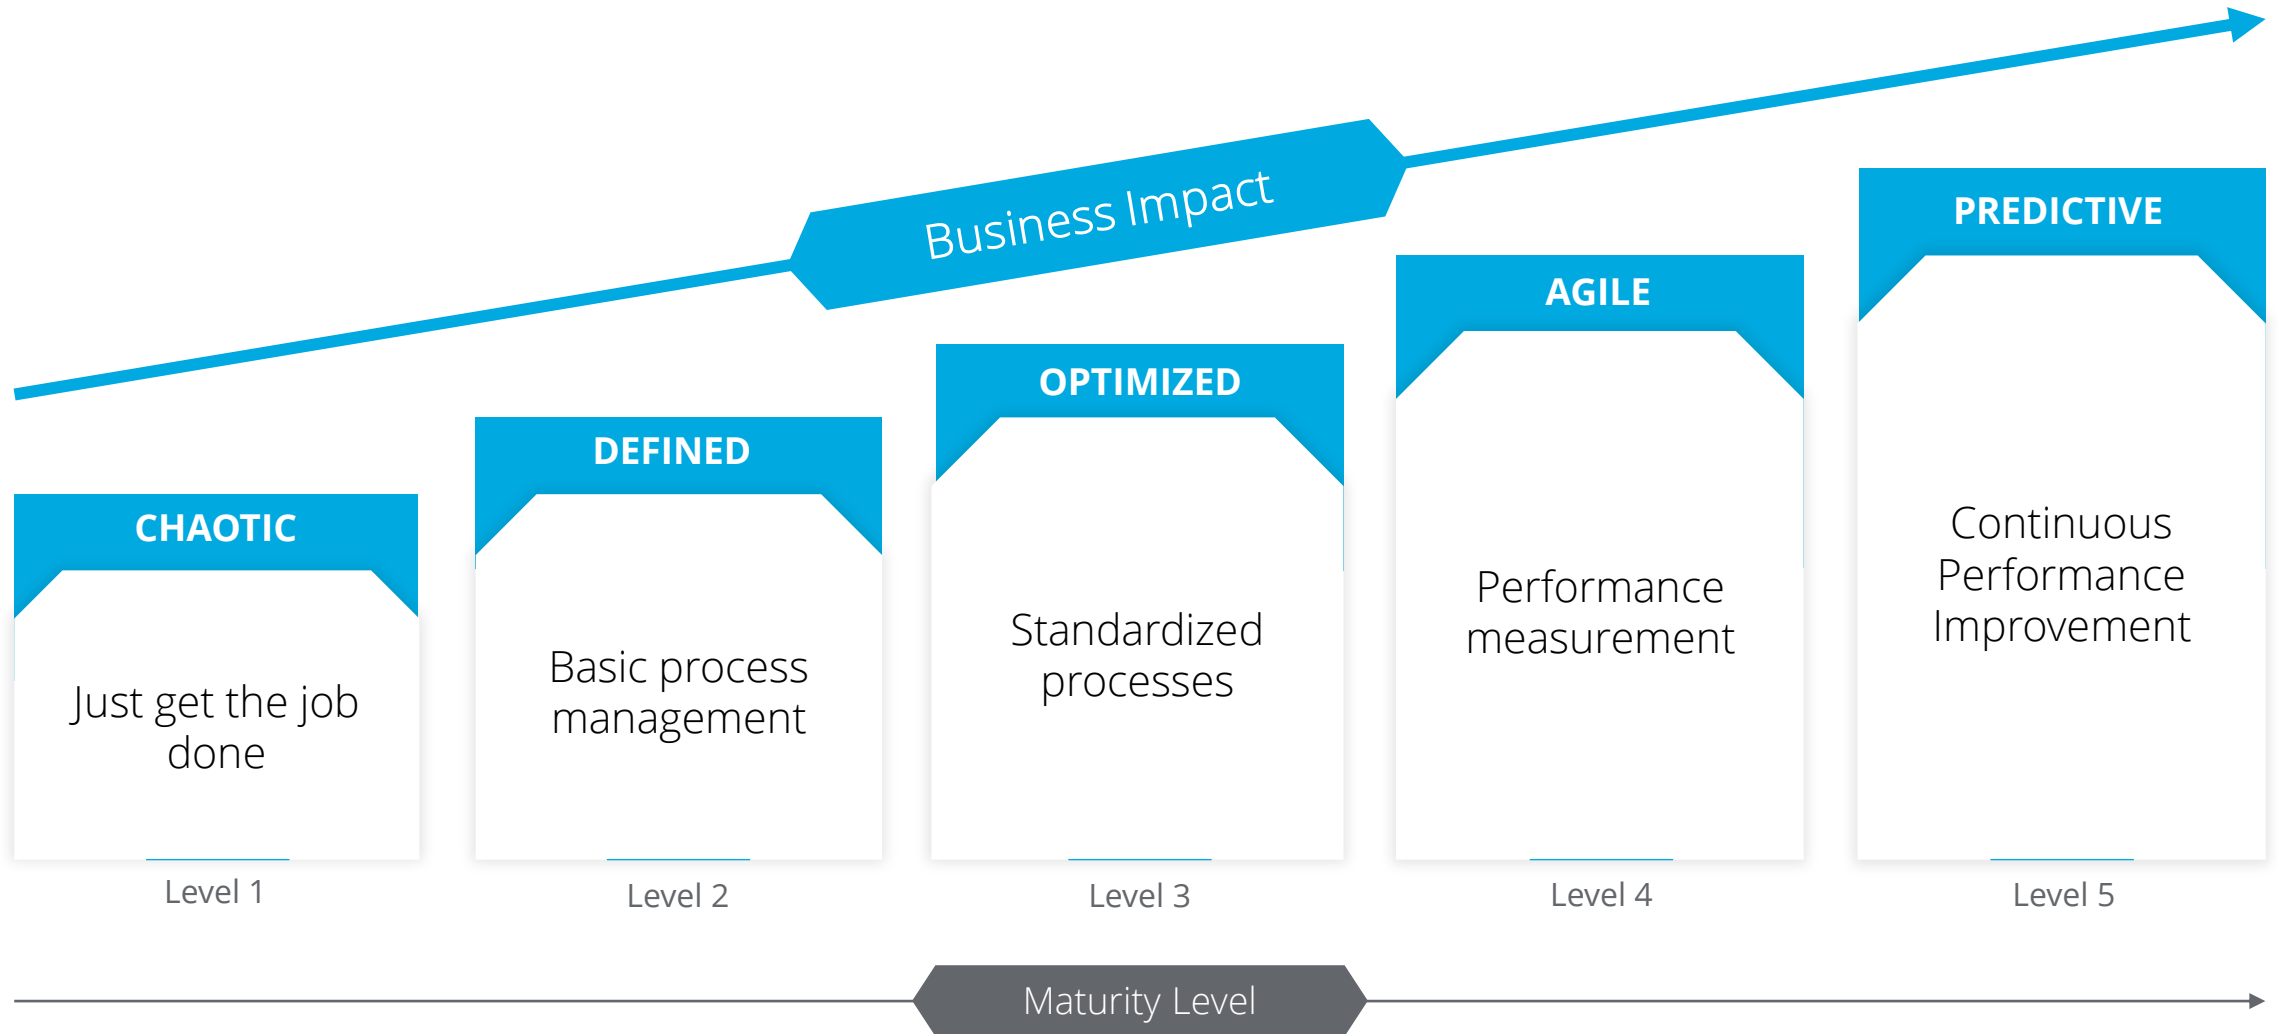

05 Solutions

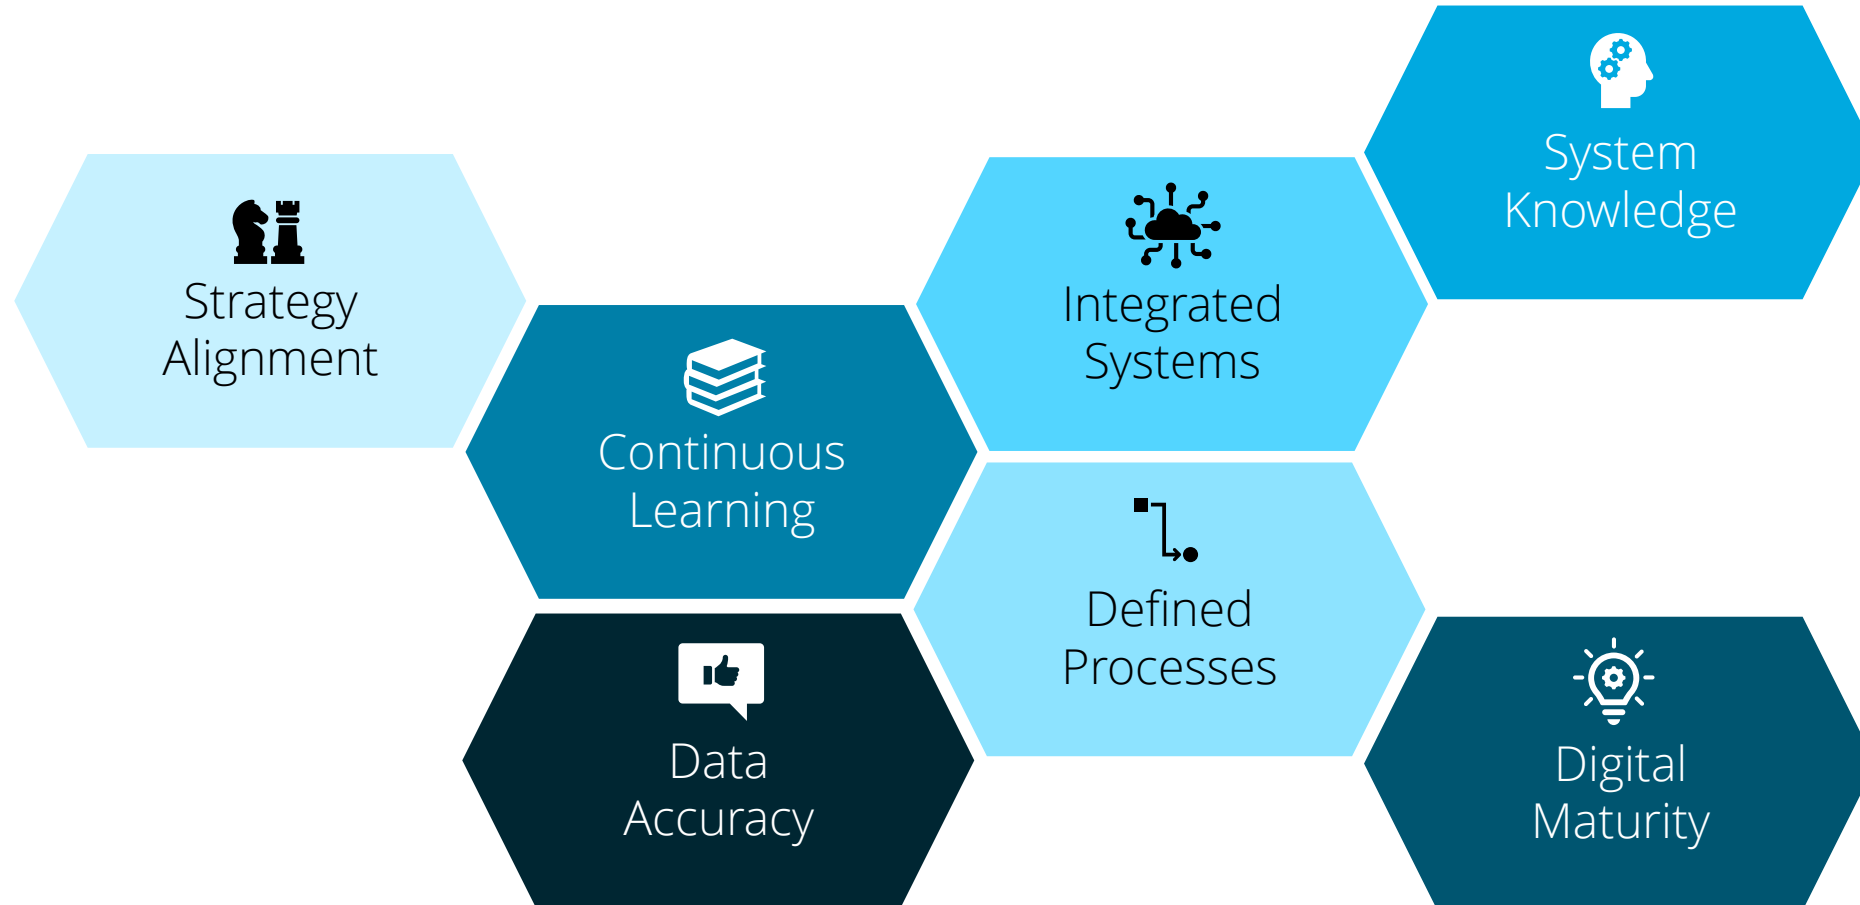

Strategy Alignment

Create a Culture of **Continuous Performance Improvement**
