

Whether you're feeding students in the lunchroom, classroom or grab & go, LINQ's **online ordering** works the way you do.

Skip the Lunch Lines

No matter what service model you choose, Online Ordering allows you to reduce crowding in your lunchroom, creating a safer environment.

Boost Participation

Online Ordering allows you to get more meals to more students in the classroom and beyond.

Serve Meals Anywhere

Whether you're serving meals at grab-and-go stations, in the classroom, or offsite, Online Ordering accommodates the unique needs of your program.

Increase Efficiency

Completely integrated with your other LINQ Nutrition solutions, filling online orders is as efficient as your everyday lunchroom operations.

Take Control

Built on a foundation of user feedback and ever-increasing demands, Online Ordering delivers an arsenal of management tools to run any nutrition program today.

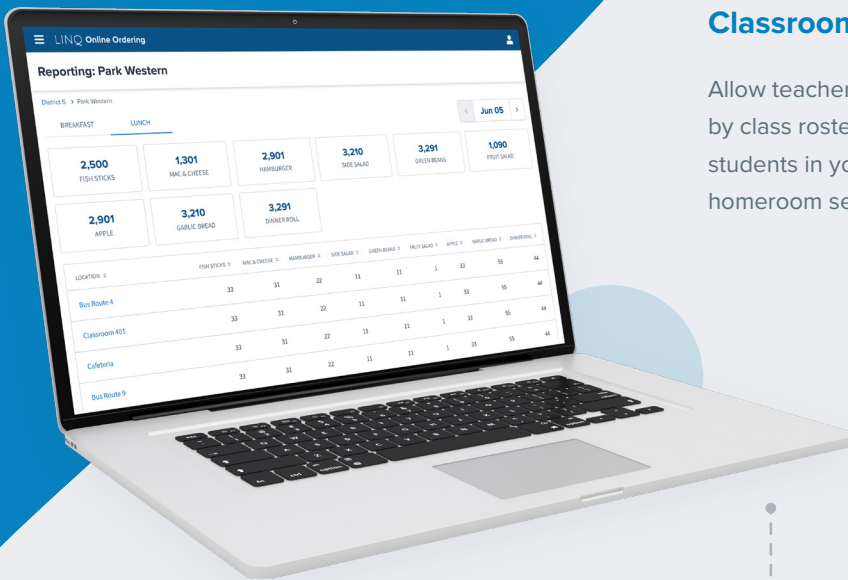

Collect Payments Online

An integration with LINQ Payments offers parents a handy online payment option, complete with low-balance notifications to prevent meal debt from piling up.

LINQ Nutrition

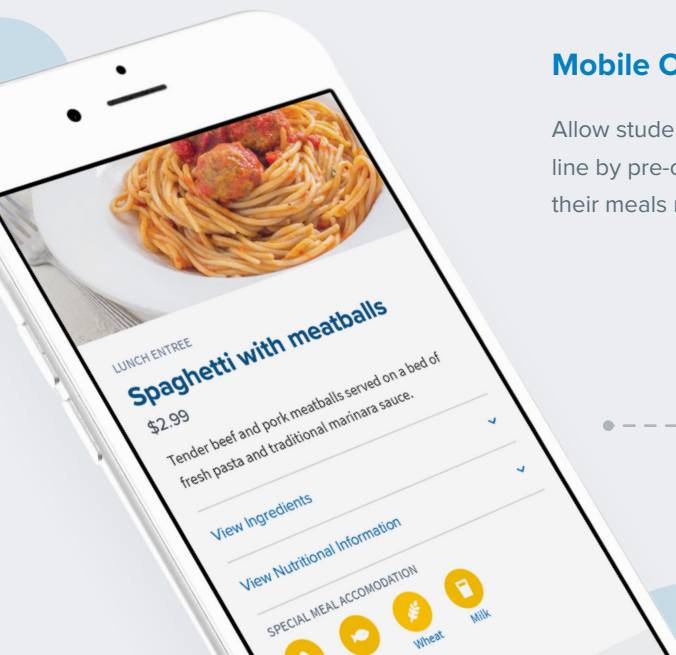

Online Ordering

Get fast, easy setup and training with LINQ's turn-key online ordering solution today!

Meal Reporting

Gain new insights with reporting that monitors districtwide student participation, from schools and classrooms to off-site pick up locations.

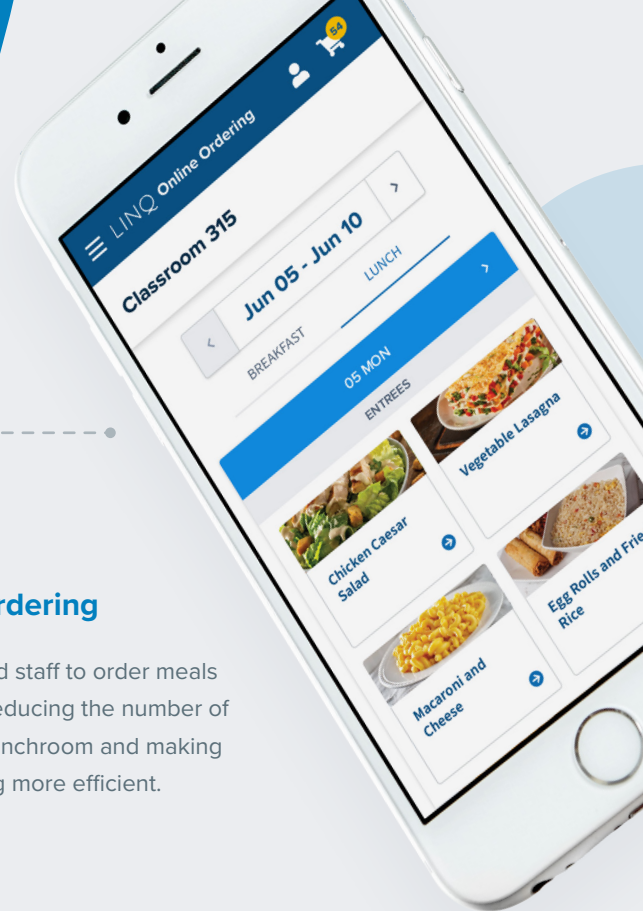

Mobile Ordering

Allow students and staff to skip the lunch line by pre-ordering and customizing their meals right from their cell phones.

Classroom Ordering

Allow teachers and staff to order meals by class rosters, reducing the number of students in your lunchroom and making homeroom serving more efficient.

Grab & Go Ordering

Meet your customers where they are. Accept bulk orders for on and off-site pick up locations, allowing students to grab their meals and go.
