

Biography:
Paul Dubois, P.E.
Oil and Gas Division
Engineering Unit
Railroad Commission of Texas

Current Position

Paul is the Manager of the Engineering Unit in the Oil & Gas Division. The Engineering Unit in Austin provides review and approval of horizontal well completions, well classification, tight gas area designations, enhanced recovery operations, gas flaring applications, and other technical matters relating to the exploration and production of oil and gas, including special products or regulatory issues that arise from time to time.

Prior Experience and Education

Paul earned a Bachelor of Science in Geophysical Engineering from the Colorado School of Mines. He is a licensed Professional Engineer in Texas. Prior to joining the Railroad Commission, Paul worked in environmental engineering and consulting for more than 20 years, focusing on hazardous waste site investigations, remedial design, and hazardous air pollutant modelling.
