Simplify Scheduling
Enhance Communication

ABOUT

PlanIt Police is a web-based personnel scheduling system built specifically for law enforcement. PlanIt is easy to use, extremely powerful and at the same time, cost effective. It includes tools to manage:

Scheduling

Time Off

Open Shifts

Court Appearances

Overtime

Payroll

Communication

Training

Human Resources

FAQs

1.) Can your system handle our 24/7 schedules and rotations?

Yes. PlanIt Police was built specifically for law enforcement. Our employee templates make it easy to create and maintain complex schedules like the Pitman schedule and Kelly rotations.

2.) How much does the system cost?

All our pricing is online for you to view at any time. We charge one annual subscription fee starting at \$1095/yr. Setup, training, and ongoing support are provided at no additional cost.

3.) Can we access PlanIt from our smartphone or tablet?

Yes. The whole system is mobile friendly and works on all devices. You can also download our mobile app for iOS and Android.

4.) Can we schedule any overtime, extra duty or special assignment in the system?

Yes. You can post open shifts for people to bid on or you can use our availability tool and fill people into shifts on the back end. When someone offers to work an open shift, they will go into the pool of approvers or you can set up multi-tiered approvals.

5.) Can we integrate this with our payroll software?

We do have multiple payroll exports in the system that will export all the regular scheduled hours, the overtime hours by code, and the time off hours by bank. These are .csv files which can be opened in Excel and a lot of payroll systems can import this information directly.
