

Introducing the Medical Board of California App for iOS.

# SERVING CONSUMERS THROUGH INNOVATION

Make informed healthcare decisions with the Medical Board of California's (Board) iOS App.

The app was developed as the Board's ongoing commitment to protecting California's healthcare consumers.

## Key Features

- Receive notifications when a doctor's name, address, practice status, license expiration, or survey data changes.
- Receive notifications when administrative actions and enforcement documents are added to a doctor's profile.
- Receive notifications when a doctor's license is suspended, revoked, or placed on probation.

## How It Works

- The app is free and available on Apple's App Store - search "Medical Board of California" to find the app and download.
- Create a "following" list to follow up to 16 doctors.
- The app must be open or running in the background in order to receive notifications.
- Immediate license profile access to the doctors being followed.

## Consumer Protection

- User privacy is protected by storing and processing all information locally on the device.
- The app does not have access to any other data on the device.
- The "follow" function is one-sided unlike other social media platforms. Licensees cannot tell if they are being followed or who may be following them.
- The app provides current information in sync with the Board's website.
