EXCIPIENT WORLD IS DESIGNED BY AND FOR THE INDUSTRY

ATTENDEE PROFILE

Formulators, R&D, engineering, operations, regulatory and compliance, quality assurance/ control, scientists, and other manufacturing professionals from pharmaceutical, biologics, veterinary medicine, combination device and consumer healthcare product companies

CONFERENCE

Presentations are carefully selected by subject matter experts and reviewed to ensure high quality, scientific (non-commercial) content. Past topics include elemental impurities, excipient regulations, 3D printing, novel excipients, content uniformity, enteric coating, supply chain security, excipient sourcing, and the FDA's Inactive Ingredient Database.

NETWORKING

We offer many opportunities to make meaningful connections and network with peers to exchange ideas, best practices, and lessons learned. Along with lunches and breaks between sessions, Excipient World will host evening events.

EXPO

Our schedule will provide ample dedicated time for exhibit floor exploration. Exhibiting companies are encouraged to staff their booth with professionals—formulators, R&D, engineering, operations, regulatory and compliance, quality assurance/control, scientists, etc.— who attend the conference sessions and are eager to engage in technical dialogue.
