

David Carlson – Waste Control Specialists

David Carlson is President and Chief Operating Officer of Waste Control Specialists, operator of a low-level radioactive waste disposal facility in Texas.

Carlson has more than 30 years of experience leading the growth and operations of nuclear energy and environmental management companies. He previously served as senior vice president of Veolia Nuclear Solutions (Kurion) where he provided technology solutions for nuclear decommissioning, including support of recovery from the accident in Fukushima Japan.

Prior roles include chief operating officer and chief nuclear officer at Gen4 Energy - an advanced reactor startup company, chief operating officer of Aqua-Chem - a manufacturer of water purification equipment; and chief operating officer of Duratek - a radioactive waste management company.

Carlson graduated from the US Naval Academy and began his career as a nuclear submarine officer.
