A New Approach for Managing Event Content

**bluesky path LEARN**

Elevate your organization's educational, professional development and virtual meeting offerings with Blue Sky Broadcast's new Path learning system.

Blue Sky's Path LMS™ is a brand new approach to educational content management and is uniquely positioned to deliver event-based learning. Optimized for media content from educational events, Path LMS allows you to manage all of your recorded content in an easy-to-use, rapidly deployed, digital library that enhances learning for worldwide audiences.

- Simply push a button to automatically transcode and publish each of your conference recordings, presentations and handout materials

- Intuitive self-service system administration—no training needed

- New, state-of-the-art responsive design that automatically optimizes for mobile, tablet, laptop and desktop computer displays

- Built-in language packs for internationalization
