

Biography: Vanessa T. De Arman
Air Quality Division
Texas Commission on Environmental Quality

Current Position

Vanessa is a Project Manager on the State Implementation Plan Team in Air Quality Planning.

Prior Experience and Education

Vanessa has a degree in Speech Communication with a minor in Wildlife/Fisheries Science (December 1993) from Texas A&M University and a graduate Certificate in Community Sustainability Management (October 2014) from the University of Colorado, Boulder Environmental Center.

At the beginning of her career in 1994, she started at the agency (then Texas Natural Resource Conservation Commission - TNRCC) as an administrative assistant for both the directors of the Office of Compliance and Enforcement and the Office of Administrative Services. She then moved to Colorado in 1999 and worked at the National Environmental Health Association as a Project Specialist for the Journal of Environmental Health and Marketing departments and then later as a Project Coordinator for Program and Partnership Development writing and managing several grant programs. She moved back to Texas and returned to TCEQ in August 2019 and joined the Air Quality Planning, State Implementation Plan Team. She oversees ozone planning for Houston-Galveston-Brazoria, Beaumont-Port Arthur, and Corpus Christi; particulate matter issues for El Paso; and particulate matter issues for all of Texas.
