

**PLC controls systems**

**Variable frequency drives**

**Motor starters**

**Microcompressor controls**

# AAIM Controls is now a quality brand of Danfoss

AAIM Controls, a Danfoss Company, is an Industrial Refrigeration engineering solution provider of custom-designed regulation and control automation solutions, from motor starters to complete PLC systems.

These components, together with Danfoss' latest industrial refrigeration technologies, can create reliable refrigeration systems that increase energy efficiency, ensure food safety, and help in the transition to alternative, climate-friendly refrigerants.

# Engineered Solutions

## Industrial Refrigeration Expertise

AAIM Controls, a Danfoss Company, is your professional engineering staff, qualified programming group, UL panel assembly shop and microprocessor design team, delivering complete turn-key solutions engineered to customer requirements. All projects come with installation wiring diagrams. Additional support, like system commissioning, can be included.

## PLC Supervisory Control Systems

We develop interfaces for complete Evaporator, Compressor, Condenser, Vessel and entire Industrial Refrigeration control systems.

## Power Solutions - Motor Starters and Variable Speed Drives

We offer standard and customized complete panel solutions that combine power products, such as VFD's and Soft Starters with PLC and embedded microprocessor controls in one enclosure, simplifying plant operations and controls.

## Microprocessor Design Engineering

In addition to complete PLC automated control systems, we have the team and expertise to design embedded microprocessors for original equipment manufacturers.
