

Understanding the Value of Standalone Plain Language Summaries of Publications: Updated Findings From an Online Survey of Readers

Jacqui Oliver^a, Dawn Lobban^a, Laura Dormer^b, Rachel Jenkins^c, Joanne Walker^b

^aEnvision Pharma Group, Wilmslow, UK

^bBecaris Publishing, Royston, UK

^cFuture Science Group, London, UK

Conclusions

The results from this survey highlight the value of PLSPs to a range of audiences including HCPs, patients, and caregivers, with most readers finding PLSPs easy to understand

Awareness of PLSPs comes through personal recommendations and a range of online sources, reflecting the need for increased discoverability and effective multichannel dissemination plans

The overall value of PLSPs is demonstrated by the fact that about half of the readers intend to go on to share the PLSP

Contact: Jacqui Oliver, Jacqui.Oliver@envisionpharma.com

Background and Objectives

- Plain language summaries of publications (PLSPs) are standalone, peer-reviewed journal articles written in nontechnical language that provide a concise overview of published scientific journal articles¹
- Since first publishing PLSPs in August 2020, Future Science Group (FSG) journals have featured 72 PLSPs as of February 28, 2023¹

Our aims were to explore the following questions:

- Who reads PLSPs?
- Why do people read PLSPs?
- How do people discover PLSPs?
- Do people find PLSPs easy to read and understand?
- Do people go on to read the original article(s) that a PLSP is based on?
- Do people plan to share PLSPs?

Research Design and Methods

- We conducted an online survey between November 2021 and February 2023 to gain insights into the value of PLSPs
- Readers who accessed a PLSP on an FSG journal website were invited to complete the survey via a popup link to SurveyMonkey

Results

- Overall, 79 readers responded to the survey. Readers did not have to answer all the survey questions

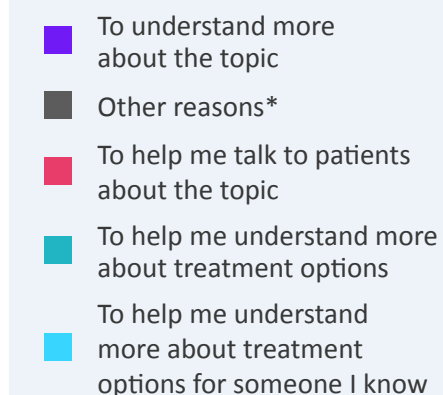

1. Who reads PLSPs?

- PLSPs attract a varied audience, including healthcare professionals (HCPs) and patients and caregivers

*Other readers included medical writers, medical communications professionals, students, researchers, industry employees, editors, publishers, and science communicators

2. Why do people read PLSPs?

* Other reasons that people read the PLSP included:
 – To learn more about PLS
 – To use for personal reasons
 – To look at the translation
 – To understand how to communicate with lay/nonspecialist audiences

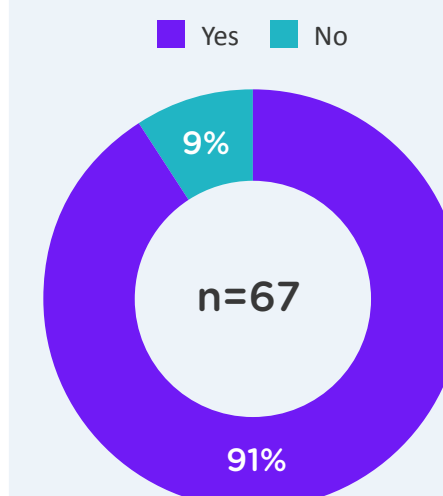

3. How do people discover PLSPs?

- Patients and caregivers were more likely to find the PLSP using a Google search, whereas most HCPs discovered the PLSP through Medline/PubMed

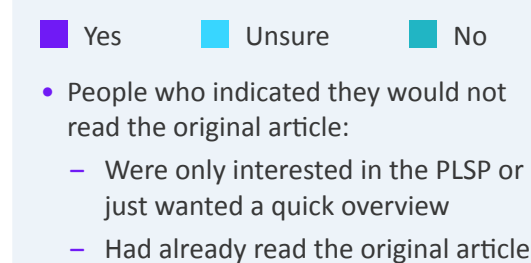

* Other ways that PLSPs were discovered were by:
 – Email/internal communication
 – Knowledge of FSG work
 – Authors
 – Website link (eg, Scholarly Kitchen, Oncology Central)

4. Do people find PLSPs easy to read and understand?

- The majority of readers found the PLSP easy to understand

5. Do people go on to read the original article(s) that a PLSP is based on?

- People who indicated they would not read the original article:
 - Were only interested in the PLSP or just wanted a quick overview
 - Had already read the original article

6. Do people plan to share PLSPs?

- Reasons for not sharing the PLSP included:
 - Reading for own interest
 - Do not work with patients
 - No need

Due to rounding, percentages shown may not add up to 100%

Disclosures and Acknowledgments

All authors took part in the research, were actively involved in preparing the abstract, and have approved the final poster. JO and DL are employees of, and own stock options in, Envision Pharma Group, a healthcare communications company that is funded by pharmaceutical companies to facilitate the creation of plain language summaries. DL serves on the ISMPP European Meeting Committee. LD and JW are co-owners of Becaris Publishing and were employees of Future Science Group at the time the survey was conducted. RJ is an employee of Future Science Group. The survey was developed by the authors and conducted by Future Science Group. Editorial and graphical support were provided by Helen Donaghy and James Julia of Envision Pharma Group. This encore abstract was previously presented at the 2023 European Meeting of the International Society for Medical Publication Professionals and has been adapted with updated survey responses.
