

Patricia McIsaac
Eurofins Environment Testing

Current Position

Product Manager

Prior Experience and Education

Patricia McIsaac has 38 years of experience in environmental testing services. Her experience includes project management, quality assurance, account management, as well as product management. For the past 20 years, she has provided business and technical leadership for Eurofins' Dredged Material, Sediment and Tissue Laboratories. As Eurofins Product Manager, she coordinates with Eurofins chemists, technical staff, and project managers to consistently support and execute our support. Ms. McIsaac will assist the client's project team in the development of a comprehensive testing strategy to support all requirements of the dredged material, sediment, and tissue programs. Eurofins 'Dredged Material, Sediment and Tissue Laboratories are committed to provide outstanding client service, the lowest detection limits, the highest integrity, the fastest turnaround times, and with the best accuracy and precision.

Ms. McIsaac earned her MS degree at the New Jersey Institute of Technology in Newark, NJ and her BS degree at Cook College, Rutgers University in New Brunswick, NJ.
