

Biography: Kasey Savanich
Air Quality Division
Texas Commission on Environmental Quality

Current Position

Kasey Savanich is a Data Analyst at TCEQ; she specializes in air quality in the state of Texas and helps calculate design values to determine if the state meets National Ambient Air Quality Standards.

Prior Experience and Education

Ms. Savanich graduated with a degree in Chemical Engineering from the University of Texas at Austin. She has worked for the state of Texas for over 14 years. At TCEQ she has helped with the NAAQS designation process for various criteria pollutants. She also calculates design values to determine if the state of Texas meets the NAAQS. In addition, she investigates trends in various NAAQS pollutants and performs various air quality analyses to determine causes of high pollutant concentrations. She also assists in state implementation plan (SIP) development by contributing to the technical analysis, which includes the conceptual models and corroborative analyses found in the attainment demonstration SIPs.
