

AXON RECORDS

AXON RECORDS

The records management solution that meets the demands of modern law enforcement.

Modern policing requires unprecedented levels of technology and information sharing to create incident-centric reporting. Axon Records harnesses the power of automation to save countless hours in the report writing, submission, and review process, helping agencies get more officers back on the streets to strengthen community relationships.

AXON RECORDS CAN HELP YOUR AGENCY

SAVE TIME

Axon Records uses one dynamic reporting engine. Teams can stop wasting time working in disparate systems, using manual processes and re-entering data in multiple places for a single report.

BREAK DOWN DATA SILOS

Bring multiple workflows into a single system by centralizing patrol, detective, evidence and records. And by integrating with 3rd-party systems like CAD, crash reporting, and citations, Axon Records can help you analyze data that spans your entire agency.

UNITE DIGITAL EVIDENCE

With direct access to body-worn camera, in-car and citizen-captured video footage, documents, images, and more, reports can be created faster. Critical evidence can be easily shared to remove the wall between digital evidence and reports.

AUTOMATE WORKFLOWS

Axon Records learns and streamlines the tedious tasks and steps in your agency's workflows with automation, so your reports can be written, submitted, and reviewed by all key stakeholders with minimal manual effort.

Axon Records is part of the Axon Network, so your agency can also take advantage of Axon's other industry-leading technology to collaborate more effectively, get to the truth and accelerate justice.

AXON RECORDS FEATURES

DYNAMIC REPORTS

Configure your reports to fit your unique agency processes. Include any required field, and create custom lists of data for each section of the report.

INCIDENT-BASED

Axon Records is with the incident at the center of all reports. Link multiple people, locations, vehicles, digital evidence, and more from each incident to create a single, seamless report.

CASE MANAGEMENT

Organize case information, track and manage case tasks, and create automated workflows to seamlessly start, assign, manage, and conclude criminal investigations. Everything from body-worn or in-car camera video, interview room feeds, CCTV camera, forensic photography, documents, and more can be easily added, searched, and reviewed within a single case package.

DIGITAL CASE SHARING

Share relevant case information with Prosecutors and court staff digitally via the existing Axon Evidence platform.

USE OF FORCE REPORTING

Collect specific data for each incident that includes Use of Force with our Standards module and report on that data for FBI UCR requirements.

REMINDERS AND ALERTS

Trigger reminders and alerts to keep the reporting process moving without delay.

NIBRS READY

Native NIBRS validation works in the background to ensure you get it right, flagging missing fields and routing rework requests to the correct owner.

INSIGHTS & ANALYTICS

Axon Records becomes your single data system by supporting and integrating data from any RMS and CAD, direct database access for SQL-based queries, and connectivity to BI tools like Tableau, Power BI, Crystal Reports, and more.

TAILORED ACCESS

Configure custom groups, roles, and permissions for anyone using Axon Records to ensure the right people have access to the right data at the right time.

SECURITY

Hosted on the Microsoft Azure Government Cloud for maximum security, uptime, and CJIS compliance.

Traditional Records Management Systems have not kept up with the pace of innovation needed to satisfy the demands of today's modern law enforcement agencies. Axon Records was created to tear down the data silos and barriers between records management, digital evidence and data analytics. By partnering with Axon to transform your Records Management System, your agency will future-proof your most critical reporting processes so you'll never be stuck with outdated, obsolete software.
