

LexisNexis® Accurint® Virtual Crime Center

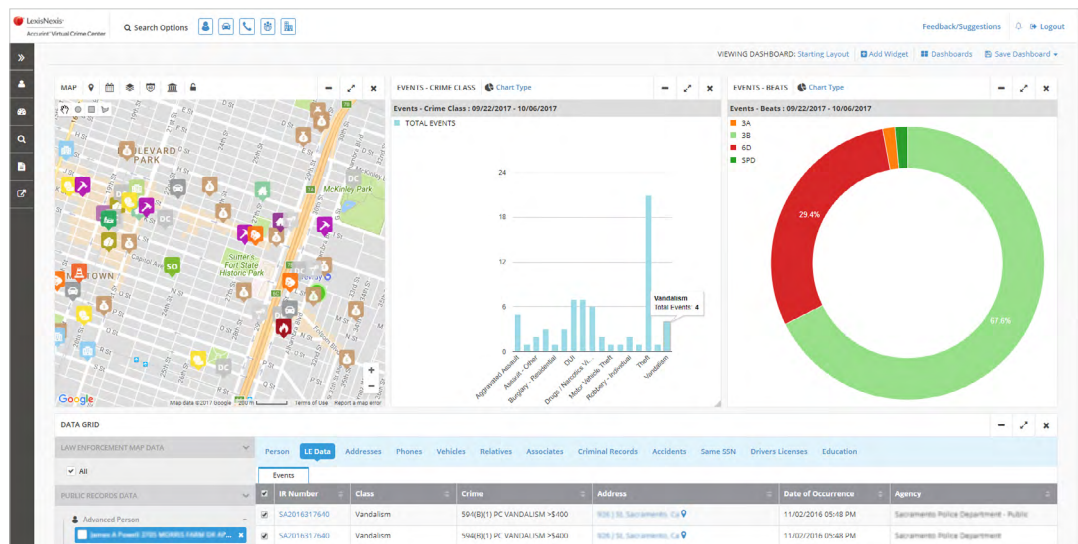

Solve more crimes and discover
hard to find information.

For years, law enforcement agencies have been seeking a place to link cross-jurisdictional data with public records in one interface to help them predict and solve crime. The next generation policing platform, Accurint® Virtual Crime Center, allows you to access law enforcement data from your neighboring agencies and from agencies across the country to build a complete picture of individuals, locations and incidents.

With Accurint Virtual Crime Center, one search returns public records linked to your agency's data and law enforcement data nationwide.

Accurint Virtual Crime Center is a next generation policing platform used for COMPSTAT, Analytics, Crime Analysis and Investigations. This solution links billions of public records to agency-provided data in a cross-jurisdictional data exchange to provide law enforcement with unprecedented visibility into crime in their own jurisdiction and around the country. Linking across data types delivers a more comprehensive view into an identity, helping law enforcement to target investigations; identify patterns and deploy resources more efficiently.

Criminals have no boundaries.

Accurint Virtual Crime Center provides agencies with a view beyond their own jurisdictions into regional and nationwide crime data. Each year, about 12% of the population moves, a statistic that is even higher for young adults. To predict and solve crime patterns, you need visibility not just to the jurisdiction next door, but across the country. The ability to view information such as crime incident data, CAD, offender data, crash data and license plate readers in the same place will assist in resolving and preventing crimes in a timely manner.

Finding the “who” in an investigation.

Uncovering and locating key individuals is vastly simplified through Accurint Virtual Crime Center. By adding our proprietary linking technology, LexID®, to agency data, you will have cross-jurisdictional agency data linked to identity information from over 10,000 sources, including social media and web presence data. This gives your law enforcement agency the ability to disambiguate RMS records, find non-obvious connections, and generate leads with one search.

Agency Data Linked with Public Records

Cross-jurisdictional agency data linked to identity information from over 10,000 sources using LexID

National Map of Crime

Agency data from across the country including:

- Crime Incident data
- CAD
- Offender Data
- Crash Data
- License Plate Reader

Data Analytics for Entire Agency

Custom dashboards for analysts, command staff, patrol and investigators

- Industry leading Visual Analytics

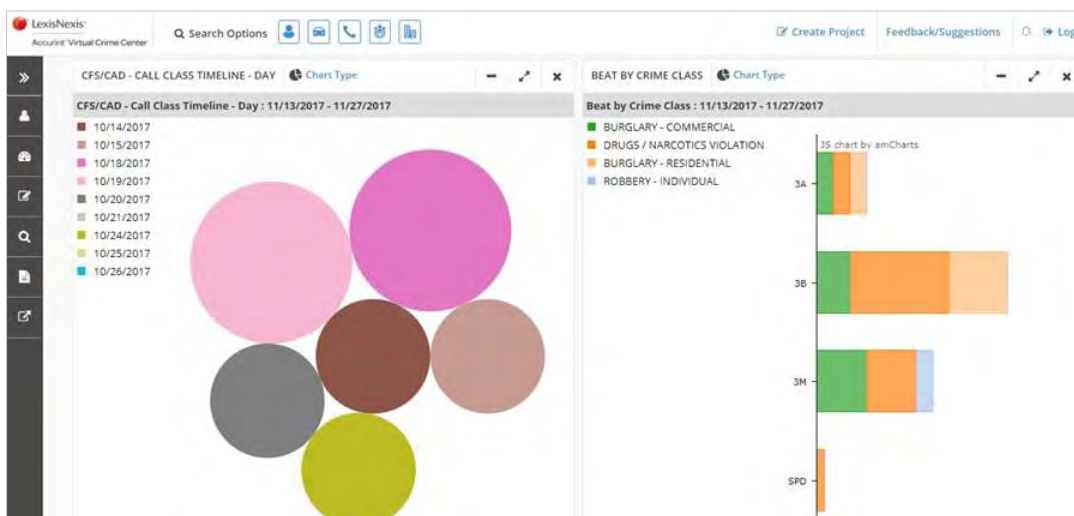

Accurant Virtual Crime Center

People, Places, Vehicles PRE-LINKED

- Complete picture of an Identity, Location or Vehicle
- Lead Generation

Flexible views for all users within an agency. Accurant Virtual Crime Center allows you to design your dashboard for your role within the agency. Whether you are a part of a command staff, supervisor, investigator or analyst, you will have the ability to search across all your own data and public records information while using the same capabilities from Accurant Crime Analysis. Accurant Virtual Crime Center will replace multiple tools agencies currently use for public records, data analytics and social media, allowing all members of the agency to be more efficient across all cases through strong data analytics.
