

Kamal Adhikari, EIT
Water Supply Division
Texas Commission on Environmental Quality

Kamal Adhikari is a team member of the Plan Review Team in Plan and Technical Review Section. He has a B.S in Mechanical Engineering from the Kathmandu University, Nepal and has been registered as engineer-in-training in a State of Texas since 2003. Kamal joined TCEQ since November of 2001. He currently works as General Engineering Specialist V and his current job responsibilities include reviewing engineering plans and technical specifications for construction, upgrades, and modifications of the public water systems. He also ranks and manages projects based on health and compliance factors for Drinking Water State Revolving Fund (DWSRF) applicants, and prepares financial, managerial, and technical reports for DWSRF applicants. He is also involved in Drinking Water Infrastructure Needs Survey Assessments.

Kamal worked as Operation and Maintenance Officer for Manakamana Darshan Private Limited (rope-way company in Nepal) prior to joining TCEQ. Before the regulations regarding Certificate of Convenience and Necessity (CCN), and rates were moved to Public Utility Commission of Texas in 2014, Kamal reviewed several contested and uncontested CCN and rates applications, prepared testimonies, and participated in public hearings.
