Open Educational Resources (OER) Panel Presentation, March 29, 2022

OER (Open Educational Resources) includes textbooks, course materials and full courses, modules, streaming videos, tests, software, and any other tools, materials, or techniques used to support access to knowledge. These resources are in the public domain and can be reused and repurposed in a variety of learning environments. Our panel of OER experts will help you to identify OER materials, advocate for the adoption of OER and engage with the OER community.

Presenters:

Christine Pawliuk, Colorado State University
        Assistant Professor / Entrepreneurship & Community Engagement Librarian
Meg Brown-Sica, Colorado State University
        Associate Dean, Research Support & Engagement
Merinda McLure, University of Colorado, Boulder
        Associate Professor / Health & Human Sciences Librarian / Libraries Open Educational Resources (OER) Co-Lead
