

Amplify

A group accreditation program

Pre-Qualifying Assessment (PQA)

To participate in Amplify, all hospitals to be considered for a cohort must pass the PQA. This process helps determine the readiness of a hospital to enter the fast-paced curriculum to accreditation environment.

Course Curriculum

The cohort will begin a synchronous virtual course with a live instructor either weekly or bi-weekly.

Each module consists of:

- Communications in AAHA Community
- Interactive content delivery
- Utilization and creation of tools to use in the practice
- Mini-assignments
- Standard section completion

Accreditation Evaluation

All twelve course modules prior to the evaluation are designed to prepare the practice in bite sized pieces and simplify the process.

Graduation: Welcome to AAHA!

Each practice that successfully passes accreditation will now be able to enjoy all benefits of an AAHA Accredited hospital. From AAHA Learning, career boards, an abundance of hospital resources & tools, the brand NEW AAHA Community, and so much more!
