HIGH SCHOOL INSPECTOR CERTIFICATION PROGRAM

HELP YOUR HIGH SCHOOL STUDENTS GET A JUMP START IN THE INDUSTRY

Prepare them for Important
ICC Exams and Certifications
that can Open Doors to Building
Safety Jobs Across the Country

Building departments around the nation face a shortage of certified professionals. Many in the industry have recently retired, or will likely do so in the near future. A career as a code professional, working in city and municipal building departments across the country as inspectors, plans examiners, permit technicians or building officials is well within the reach of today's high school seniors and graduating students. That's why West Coast Code Consultants, Inc. (WC³) is excited to partner with high school trade programs to provide low-cost, International Code Council (ICC) exam preparation and online training to interested students from all backgrounds, genders, races and ethnicities.

Preparing Today's High School Students for a Bright Tomorrow

The High School Inspector Certification Program is designed to jump-start high school students in obtaining ICC certifications, which are honored in nearly every state, and will help open doors to new careers in the building safety and construction industries. Affordable exam preparation courses, taught by industry experts, offer 365 days of unlimited access to multiple code related topics. The structure of the WC³ Academy enables high schools, trade schools, and vocational colleges to integrate one or more of these courses into their curriculum to accommodate different objectives, enhance student learning and provide a sound base of the building industry and construction trades. Student's in the program typically begin with the WC³ Academy course offerings surrounding the ICC's International Residential Code (IRC). This course lineup is divided into four parts including the building, mechanical, electrical and plumbing disciplines.

Due to the flexible nature of the program, WC³ Academy courses can be completed online, at anytime, from anywhere, on any device!

WC³ is an approved Preferred Education Provider for the ICC. WC³ is often asked to provide building and fire code classes to programs all over the nation.

Additional benefits of the High School Inspector Certification Program include:

- » Students learn up-to-date code information that applies to the industry and workplace
- » Students are better prepared to pursue career and college opportunities
- » Program includes on-demand exam preparation courses, simulated practice tests based on the same materials covered in the ICC exams, as well as the International Residential Code (IRC) Book and Turbo Tabs
- » Upon completion of each of the four (4) disciplines of the program, as well as passing the final course exams, students will receive Certificates of Completion
- » Students who complete all four (4) parts (earn all four Certificates of Completion) will be better prepared to sit for the ICC Residential Building Inspector Certification exams that are required in most jurisdictions to obtain a residential building inspector position

WC³ ACADEMY

Trusted Nationally in Test Preparation for ICC Certification Exams

Who is WC³?

West Coast Code Consultants, Inc. (WC³) specializes in providing plan review, inspection and staff augmentation services to local municipalities, state entities and federal agencies. As part of our services, we train building officials, plans examiners, inspectors, design professionals, and contractors to assist in learning various aspects of adopted code. As an approved ICC Preferred Education Provider, courses are taught by instructors who have years of practical experience and are well respected in the field.

Who is ICC?

The International Code Council (ICC) is a non-profit organization, with more than 67,000 members, dedicated to developing a single set of national model construction codes for the purpose of constructing sustainable, affordable and resilient structures. All codes are developed through the governmental consensus process, thereby providing the highest level of safety in the world. Most U.S. communities and many global markets choose the ICC's approved International Codes, or I-Codes, as their model codes.
