

What we do

Building healthcare that gives more

We are a national on-site, near-site and virtual primary care provider on a mission to fix America's broken healthcare delivery model.

Everside Health, formerly Paladina Health, Activate Healthcare, and Healthstat, exists for a very simple reason: to build healthcare that gives more. More time, more care, more peace of mind, more health, and more happiness. We know that this is the way to fix healthcare: we help you and your employees feel both known and empowered as you navigate the challenges (and successes) of your unique health and wellness journeys. We're right there by your side.

How we do it

Partner with organizations

- Care models tailored to employer needs (clinic locations, hours and services)
- Improve employees' (and their families') health + well-being
- Increase employee retention and productivity
- Reduce medical claims spending and total cost of care

Empower providers

- Incentives based on outcomes, patient satisfaction and engagement (not volume)
- Physician-led care teams
- 70% fewer patients than traditional doctors
- Total care coordination and referral management

Engage employees

- In-person and virtual care
- Direct, 24/7 access to a doctor
- Personalized care plans
- Broad scope of services for 90% of healthcare needs
- Convenient online tools
- Locations near home/work
- Unlimited time with provider

Results: long-term cost savings and better health outcomes

Cost savings

Return up to **\$1.85** for each
\$1 invested per year

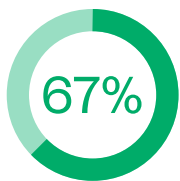

Lower total healthcare
costs by up to **25%**

Save members more than
\$350 on copays annually

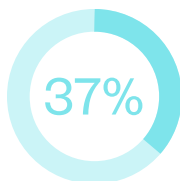

“Everside Health has been transformational in the way healthcare is provided to our employees and families and transformational in the way we can manage our healthcare costs as an employer.”

— **Linda Haley**, City of Arvada,
Director of Human Resources

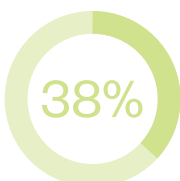

Better health outcomes
