

# / AXON RESPOND

## FASTER, SAFER AND MORE EFFICIENT RESPONSES WITH A REAL-TIME OPERATIONS PLATFORM

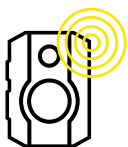

Axon Respond is a real-time operations platform which integrates real-time situational awareness and unified communications within a modern incident management solution. Harnessing data from sensors in the field, public safety agencies are empowered to know before it's voiced and rapidly coordinate responses with a unified communications platform. This drives faster response times, safer officers and communities as well as the optimal deployment of limited resources.

### AXON RESPOND IS A REAL-TIME OPERATIONS PLATFORM COMPRISED OF

#### / MODERN DISPATCH

Manage and act on calls for service faster with intuitive and collaborative user experiences built from the ground up with dependable cloud technologies and focused on getting more done with less effort.

#### / REAL-TIME SITUATIONAL AWARENESS

Get a complete picture of evolving situations and resolve them quickly with officer location data, situational changes and video feeds from Axon devices – all within a single system.

#### / UNIFIED COMMUNICATIONS

Send the right information to the right people at the right time through voice or text messages with automated event channels and robust attachment support – on any device.

## OUTCOMES DELIVERED

### / FASTER RESPONSE TIMES

Expedite responses to calls for service through a faster, more intuitive interface which empowers users to complete necessary tasks faster with the least amount of effort.

### / REDUCE AVOIDABLE USE OF FORCE

Prevent escalations before they occur through next-generation visibility. Know locations of individual first responders, how they are responding to situations and other critical data points to direct the appropriate resources at the right time to maximize successful resolutions.

### / OPTIMIZE THE DEPLOYMENT OF LIMITED RESOURCES

By being more situationally aware of the developing calls-for-service, dispatchers are best equipped to dispatch the optimal level of necessary, yet often scarce resources.

### / INCREASED OFFICER AND COMMUNITY SAFETY

Harnessing the wealth of signals produced in the field, Axon Respond empowers dispatchers, supervisors, and command staff to know what is happening before responding officers radio in updates. From knowing the locations of individual officers to specific actions that are taken, they can proactively take actions to greatly increase the safety of both the officer and greater community.

## FEATURES AND BENEFITS

**MODERN USER EXPERIENCE:** Intuitive user experiences empower you to do more with less effort.

**LOCATION VISIBILITY BEYOND AVL:** Augment AVL with the ability to locate individual first responders with Axon Body 3 tracking on live maps.

**AGILE ESRI-POWERED MAPPING:** Easily create, modify, maintain GIS data with more consistently updated mapping.

**CONNECT WITH CRITICAL SYSTEMS:** Access the information you need with the least effort whether it's federal, state or local databases, field sensors, an RMS system or other sources of truth.

**INTELLIGENT MESSAGING:** Users assigned to an event are automatically added to event-specific channels to enable them to simply start messaging rather than choosing the appropriate contacts.

**KNOW BEFORE IT'S VOICED:** Harnessing data from sensors in the field, know about potential escalations, the need for backup and even access live streams – on live maps.

**BETTER INFORMED FIRST RESPONDERS:** Units are automatically updated with real-time information about events they are responding to, including narrative, caution information and backup unit status and location.

**INFORMATION WHEN YOU NEED IT:** Users only see alerts and notifications when necessary to minimize distractions and maximize their focus.

**SUGGESTED DRIVING ROUTES:** First responders are equipped with suggested driving routes incorporating real-time traffic data and satellite imagery to provide context for the scene that they are heading to.

**ALWAYS UPDATED & AVAILABLE ANYWHERE:** Built with modern cloud technologies, you can access Respond on any device and know you're getting all updates at no additional cost.
